

Forest Habitat Display Board

Use a flannel board with shapes cut from felt, which will stick to the flannel. Or use any display board around 22" x 32" with shapes cut from colored paper and stick paper shapes to display board with double sided tape. Our board was made from two pieces of corrugated cardboard covered with 1 yard of light blue flannel from the fabric store. The flannel was folded to the

back and taped with 2" wide masking or duct tape. Corners were folded as if wrapping a gift. We added a second layer of green flannel for the grass, but you can more easily just draw a chalk horizon line and let the line of mountains separate the foreground from the sky.

Tree Trunk - Dark Brown
Cut 4

Evergreen Tree - Green
Cut 4

Mountain - Purple
Cut 3 large triangles from this pattern and 2 smaller triangles from scraps.
