

Make Alphabet Banners for abc airline

The *abc airline Alphabet Banner* encourages children to practice printing the lower case letters a to z. The alphabet is presented in a special “School Font”, which has guide lines and dots to help children visualize the written letters. This project can be worked on for two days. On the first day, the children trace the letters with a crayon or felt pen and color the airplane if they wish.

On the second day, children cut out the sections of the banner along the dotted lines and recite the alphabet as they paste the sections together in the right order. A glue stick works well for the pasting. To finish, they tape a bit of ribbon between the airplane and the front end of the banner and then tape the *abc airline Alphabet Banner* onto a window or wall.

We hope you and the children you work with will enjoy making this alphabet banner and we hope you will visit our Web site often for new ideas and projects.
